

Climate change

eslvideo.com Quiz by: rociulloav

1. Greta says that we can still ____ this problem.

- fix
- find
- feed

3. A tree is like a magic machine that removes _____ from the air.

- cartoon
- carbon
- carton

5. Nature is a tool we can use to _____ our broken climate.

- repair
- dispair
- remake

7. George says that we are destroying our planet _____ than ever.

- louder
- faster
- quicker

9. We need to protect, _____ and fund.

- store
- offshore
- restore

2. We need to stop burning _____ to survive.

- factories
- fossil fuels
- liquid fuels

4. Coral reefs also take carbon _____ of the air.

- in
- about
- out

6. Part of the money invested in climate change solutions comes partly from our taxes and our _____.

- sayings
- pocket
- savings

8. Up to _____ species are going extinct every single day.

- 2,000
- 200
- 20,000

10. All around the world, there are amazing movements _____ for nature.

- crying
- thinking
- fighting

Gap-fill

Complete the sentences using the words below.

Wordbank

fix fossil fuels carbon out repair savings faster 200
restore fighting

11. How many people think NY is bigger than San Francisco?
12. Who cook better?
13. What's the most beautiful city in the USA?
14. What's the most beautiful country in the world?
15. What's the coldest country in the world?
16. Which is the biggest city in Scotland?
17. Which is the biggest city in Ireland?
18. Which is the longest river in Ireland?
19. What's Mary Luise's favourite place in Europe?
20. Which country does Ken like the best?
21. What are the French like?
22. Music is...
23. Which is the most beautiful language for the majority of the interviewees?
24. Who likes German?
25. How many people like Italian?
26. Who thinks Spanish is beautiful?
27. What other Languages are mentioned?
28. Why does Kelly like English?
29. What is the origin of this kind of music?
- 30.
- 31.
- 32.

00:00

this is not a drill my name is Greta Tim

00:06

berry we are living in the beginning of

00:08

a mass extinction our climate is

00:12

breaking down children like me are

00:15

giving up their education to protests

00:18

but we can still fix this you can still

00:22

fix this to survive we need to stop

00:25

burning fossil fuels but this alone will

00:28

not be enough lots of solutions I talked

00:32

about but what about a solution that is

00:34

right in front of us I'll let my friend

00:36

George explain there is a magic machine

00:39

that sucks carbon out of the air costs

00:43

very little and builds itself it's

00:46

called a tree a tree is an example of a

00:50

natural climate solution mangroves peat

00:54

bogs jungles marshes sea beds kelp

00:57

forests swamps coral reefs they take

00:59

carbon out of the air and lock it away

01:02

nature is a tool we can use to repair

01:06

our broken climate

01:08

these natural climate solutions could

01:10

make a massive difference pretty cool

01:12

right

01:13

but only if we also leave fossil fuels

01:16

in the ground

01:18

here's the crazy part right now we are

01:23

ignoring them we spend a 1000 times more

01:27

on global fossil fuel subsidies that are

01:30

natural based solutions natural climate

01:33

solutions get just 2% of all the money

01:36

used on tackling climate breakdown this

01:39

is your money it is your taxes your

01:42

savings even more crazy right now when

01:45

we need nature the most we're destroying

01:48

it faster than ever after 200 species

01:51

are going extinct every single day much

01:54

of the Arctic ice is gone

01:56

most of our wild animals have gone much

01:59

of our soil has gone so what should we

02:02

do what should you do it's simple we

02:05

need to protect restore and fund protect

02:10

tropical forests are being cut down at

02:13

the rate of 30 football pitches and

02:15

minutes where nature is doing something

02:17

vital we must protect it restore much of

02:22

our planet has been damaged but nature

02:25

can regenerate and we can help

02:27

ecosystems bounce back fund we need to

02:33

stop funding things that destroy nature

02:35

and pay for things that help it it is

02:39

that simple protect restore

02:42

[Music]

02:44

this can happen everywhere many people

02:46

have already begun using natural climate

02:48

solutions we need to do it on a massive

02:51

scale you can be part of this vote for

02:55

people who defend nature share this

02:58

video talk about this all around the

03:01

world there are amazing movements

03:03

fighting for nature join them

03:10

[Music]

03:13

everything counts what you do counts

03:19

[Music]
